REASONS for ALLOWANCE

Allowance of Subject Matter

1. The following is an Examiner's statement of reasons for allowance.

Claims 1-10 are allowed.

Claims 1-10 recite novel features comprising a method of transcoding, comprising:

a) receiving encoded motion-compensated video including motion vectors and frame-DCT blocks;

b) downsampling the blocks as:

i) for an I-picture or P-picture DCT block, applying a two-dimensional inverse DCT and then applying a downsampling with respect to the horizontal dimension;

ii) for a B-picture DCT block, applying a one-dimensional de-interlacing inverse DCT with respect to the vertical/column dimension of the block and then applying a one-dimensional IDCT and a downsampling with respect to the horizontal/row dimension;

c) applying inverse motion-compensation for results from step b);

d) after step c), applying a downsampling with respect to the vertical dimension for the results of step b)i);

e) repeating steps a)-d) for further DCT blocks and motion vectors;

f) encoding the results of step e).

The prior art of record fails to anticipate or make obvious the novel features (extra emphasis added on **underlined limitations**) as discussed above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

A) Mori et al (6,931,064 B2), Motion picture data converter, and computer product.

B) Yoo et al (6,999,512 B2), Transcoding method and apparatus therefor.
